No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       seq length: 0

Sequence 15, Application US/09807802A

Patent No. 6759237

GENERAL INFORMATION:
APPLICANT: Wilson, James M.
APPLICANT: Wilson, Weidong
TITLE OF INVENTION: Adeno-Associated Virus Serotype I Nucleic Acid
TITLE OF INVENTION: Vectors and Host Cells Containing Same
FILE REFERENCE: GNVPN.031USA
CURRENT APPLICATION NUMBER: US/09/807,802A
CURRENT FILING DATE: 1998-11-05
PRIOR APPLICATION NUMBER: US 60/107,114
PRIOR APPLICATION NUMBER: PCT/US99/25694
PRIOR APPLICATION NUMBER: PCT/US99/25694
PRIOR APPLICATION NUMBER: PCT/US99/25694
PRIOR FILING DATE: 1999-11-02
NUMBER OF SEQ ID NOS: 20
SOFTWARE: PatentIn version 3.1
LENGTH: 599
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              RESULT 2
